

Dreamweaver Film and Video Productions

Dear Grip,

I am sorry to inform you that as Dreamweaver is merging with Mercredi Productions, we will be laying off all technical personnel 3 weeks from today. Only the production and art department heads are staying on right through the restructuring process. This is not anything to do with your work performance, which has been excellent.

Since you first came on as a production assistant, you have made steady progress and I think you're ready to key the department. I am sure there will be positions opening as soon as the restructuring is complete. Keep your eyes peeled, and good luck!

Sincerely,
Paul Sharpe
Producer
