Making the world a more beautiful place

DEAR HORTICULTURALIST,

It has come to our attention that you apparently still have a problem with the weed and pest control products that we use and sell. We have disagreed about this before and now I understand that you have been discussing the matter with our customers. This is extremely inappropriate. Although you may think you are giving our customers good advice, it is not in our best interest to publicize our use of these chemicals and you will stop it immediately.

You are a very good worker, the customers do like you and we have been reluctant to let you go. However if environmental factors are so very important to you, perhaps you would be happier somewhere else. Please consider this as a notice of termination effective three weeks from today.

Sincerely,

Don McGuire
Owner/Operator
