

PRODUCT TESTER

ELECTRIC GENERATION HOME APPLIANCE

Next month we will be opening our new electronic product assembly facility
in the Norfolk region.

We are the world's leading manufacturer of Home appliances
and specialty microelectronic components.

*Duties will include inspecting and testing electronic and
electromechanical assemblies, subassemblies, parts and components
to ensure conformance to industry standards.*

**High School education and some post-secondary training in basic
electronic theory and testing techniques is necessary.**

**Two years experience as an electronics assembler
or component fabricator would be preferred.**
