

Environmental Services Technician

Interland Conservation District Conservation District Manager is seeking a permanent full-time Environmental Specialist to deliver soil and water conservation programs, under the direction of the Board.

Duties:

- * Development, promotion, and delivery of local conservation programs, projects, and initiatives.
- * Preparation of annual program budgets and overall supervision of budgets.
- * Writing of external funding proposals to support program initiatives.
- * Provision of technical and professional advice to the Board, participating municipalities, and landowners.
- * Develop and maintain cooperative relations with the public, municipal, provincial and federal governments.
- * Participate in the development and delivery of integrated watershed management plans with stakeholder groups.
- * Development and implementation of surface water management planning initiatives and projects.

Requirements:

A post-secondary education in resource management, environmental science, engineering, or a related program.

Candidate must possess excellent oral and written communication, organizational and interpersonal skills. Knowledge and experience in agricultural practices, GIS software, beneficial management practices and general resource management planning would be an asset.

We offer a full range of competitive employee benefits and a district office. Submit a cover letter and resume to:

Interland Conservation Authority, Box 2740, Somewhere
