

Cardidge University

Established in 1955, Cardidge University is a dynamic post-secondary institution which offers a full range of undergraduate and graduate degrees in arts, business, engineering, and science. Our Faculty of Medicine is world-renowned for leadership in the field of AIDS research and treatment. Recently we were generously funded to increase our efforts in this work. We are currently seeking an outstanding

MICROBIOLOGIST

to join our research team. We are presently working in partnership with the Mai-Lei Institute of Endocrinology in Kyoto.

Applicants will have a Ph.D in microbiology, with specialization in endocrinology, and a minimum of five years experience in research, with published results.

Familiarity with recent work from Japan in this area would be desirable. Strong leadership and administrative skills combined with innovative thinking will characterize the successful candidate.
