

QUALITY
ASSURANCE
TECHNOLOGIST

is a non-profit organization dedicated to the protection of the rights and safety of consumers in regard to the products they buy. We make recommendations to government and industry, and in special cases, provide advocacy in cases requiring litigation.

We are currently seeking a bright and attentive individual to develop and maintain inspection and testing methods for microelectronics products to assure quality standards.

The successful candidate will work closely with field inspectors, and must therefore demonstrate good interpersonal and communications skills.

We will provide specialized training to a college graduate who demonstrates sound technical ability. Previous experience in the microelectronics sector is essential.

Please respond no later than next week to the address below.
