

**MultiSoft
Solution Inc.**

a consulting group of cutting edge software specialists

requires a

Computer Software Engineer

with real world experience in Software Design

The Software Engineer who joins our consulting team will be working on some of the most exciting developments in software for the new millenium. We concentrate entirely on design and innovation—we sell ideas!

The successful candidate will be a creative and highly-motivated problem-solver with proven expertise in developing software for scientific, industrial, and environmental application. Comprehensive knowledge of computer languages and excellent communications and interpersonal skills are required. Teamworking and management skills are also essential.

Bachelor of Science in Computer Software Engineering with at least five years experience in the field should forward résumés, with references, to: Nick Tomova, MultiSoft Solutions, P.O. Box 9364, Stn. A, Silicone City.
