

Petland Animal Hospital
is seeking a

Doctor of Veterinary Medicine

interested in sharing a busy established practice in a prime location

We have a beautiful new clinic established next door to pet grooming and pet supply shops, with outside kennels, state of the art surgical and x-ray equipment, excellent support staff and a growing clientele.

Presently we are two, but three's a company! We need a recently graduated vet who specializes in small animals and household pets to join our practice as an associate and eventually, a full partner.

.....
We are looking for someone who speaks cat and dog fluently, has at least three years experience as an assistant, and can provide references attesting to good surgical technique.

Please send résumés with references to Partners, at: Petland Animal Hospital, Meadows St., Yourtown.
