

Business opportunity for a

Fast Print Technician

I have a Bachelor's Degree in Marketing and have managed this shop for the past three years. I am presently taking it over from the previous owner. I want a partner with excellent **technical skills including graphics and desktop publishing software, creative ability, high standards of quality, and a respect for deadlines.**

I hope to eventually sell out to this partner in order to capitalize my own long-term business plan.

We will run the business as a team. I do business, marketing, banking, bookkeeping, and front desk. **You do job estimates, layout, formatting, design assistance, and printing.**

We both do planning, cleaning, and as much overtime as we can stand.

Some initial capital investment is necessary, but we can negotiate a workable plan for you to acquire ownership. If you are the person who can make this business work with me, we'll aim at a mutually satisfying separation when the business is really up and going strong. Then you can hire someone to replace me!

If you've ever wanted to run a shop your way—this is your chance! Send me your impeccably printed résumé today and maybe we'll talk business soon. Shawn Kavanaugh @ Matrix FastPrint, 460 High Street.
