

ENTERPRISE AEROSPACE ENGINEERING
exploring new frontiers

seeks a highly motivated

Aerospace Design Engineer

to act as section leader in structural design, testing, and development of prototype satellites and spacecraft. Must have experience in mechanism and structural design. He or she will have responsibility for analysis, design, and assembly of structures and may be required to design and build specialized mechanisms. Experience with finite element software is preferable.

The successful candidate will have a Master's Degree in Aerospace Engineering, or a Bachelor's Degree and five years hands-on experience in the industry, with a proven flair for innovation and breakthrough problem-solving.

If you can see the future and want to make it happen, forward your résumé with two references who are able to comment knowledgeably on your abilities to:

Dr. Hannah Browne, Enterprise Aerospace Engineering, P.O. Box 3847.
