

Inland Hospital Medical Center, a 300 bed, nonprofit regional medical is seeking a Specialist of Sterile Processing to join our leadership team.

Our Sterile Processing Department supports 15 surgical suites, averaging 1200 – 1400 surgeries a month with services in General Surgery, Orthopedics, CV, Hearts, Neuro, Total Joint, Urology, GYN, Plastics, Eye, ENT and Bariatric, for which we received the “Center of Excellence” award.

Responsible for:

Assisting in the daily operations and activities of the Surgical Processing Department in accordance with established policies, procedures and standards.

The “right fit” we are looking for includes the following experience and traits:

- Ability to work and influence change for quality of care process improvement
- Clinical knowledge
- Displays positive attitude and has ability to motivate others
- Relates well with others
- Strong oral, interpersonal communication skills
- Ability to communicate effectively with operating unit and management personnel to elicit cooperation
- Computer skills: word processing, spreadsheet and data entry
- Performance improvement process skills
- Assist in professional development for staff
- Contribute to staff evaluations

Requirements

Prefer a BA/BS, Business or related healthcare field.

Advance knowledge of sterilization practices, instrumentation, decontamination processes, medical/surgical supplies and patient related equipment.

Work experience within the intraoperative arena or equivalent experience.

Must attain and maintain CRCST registration registration within first year of employment.
